

*Personalized, Closed  
collaboration platform across  
the care continuum*

ACL Digital's CareCircle, is a healthcare community engagement platform that connects everyone with your healthcare professionals, care teams, family members, and friends you trust. The engagement platform will always act like your buddy mentor to stay up to date on essential care activities and health information. With secure messaging, CareCircle personalizes, coordinates, and extends care experience to patients, physicians, and clinicians.

Healthcare professionals, including doctors, nurses, lab technicians, aides, and more, play a crucial role in delivering critical care services for the sick, injured, and ailing population. CareCircle is designed to unite institutions by engaging frontline and knowledge workers to promote a positive workplace experience. As a result, the CareCircle value delivered depends on the healthcare professionals and level of access.

- For patient experience, connects everyone in your trusted health circle
- For employee experience, empowers to create, secure, share knowledge and spread ideas

**Transforming patient experience with connected care**  
A community engagement platform to create secure digital spaces for your patient and healthcare professionals.

## Features and Functionalities

### Communication

- **Activity Stream** - Activity streams display a group, member, or community's activities chronologically
- **Groups** - Users can create and join public, open, and closed groups. Patients, by default, will be a part of the closed group.
- **Posts** - Users can share brief messages, videos, and images through posts.
- **Events**: Users can create, organize, and manage public and private events.
- **Comments & likes** - Provide comments on various topics and posts. Users can share and support the emotions through likes, get well soon etc.
- **Private Messaging** - Send private messages to a User or group.
- **Attachments** - Add attachments to all content and comments. It also allows for capturing medical records in one place.

- **Highlight Content** - Highlight the critical content that stands out for extra attention.
- **Follow groups/members** - Follow the members or groups to stay informed on the latest content.
- **Tagging** - Content can be tagged with labels, making content easy to find and well organized.

### Data & Security

- **Single Sign-on** - One login reduces security risks while making it easier to access.
- **Delete Accounts & Personal Data**: Members can delete their accounts and are informed about which information is deleted and retained.
- **Account Setting** - Manage user login details, notification settings, privacy settings, and account status.
- **Data Policy** - The administrator can create and update data policies, and regular members can provide or withdraw consent.
- **Content Visibility** - Users can determine the visibility of content they publish - public, group members, or community.

### Content Management

- **Widgets** - Easily find the latest topics, events, groups, and new users grouped as widgets.
- **Search** - The powerful search function allows Healthcare professionals to find what they need quickly.

### Platform Configuration

- **Landing page** - The administrator can set the home page based on user types.

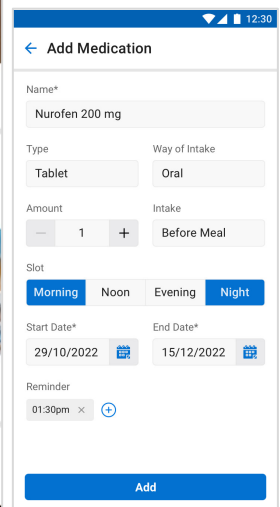

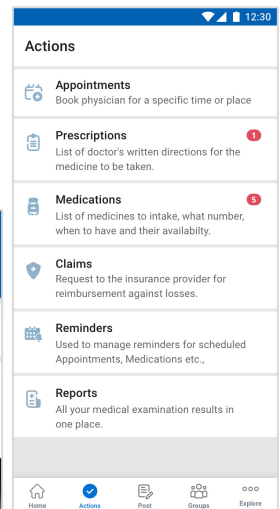

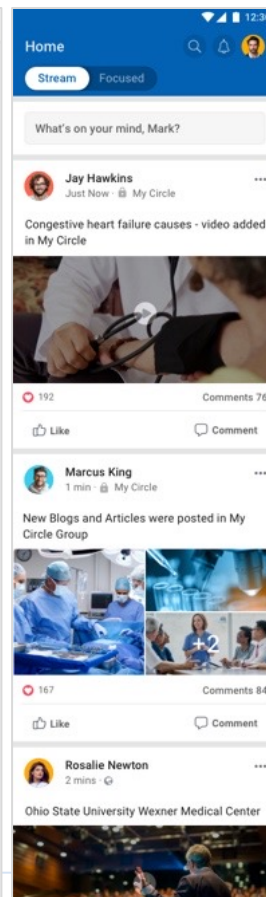

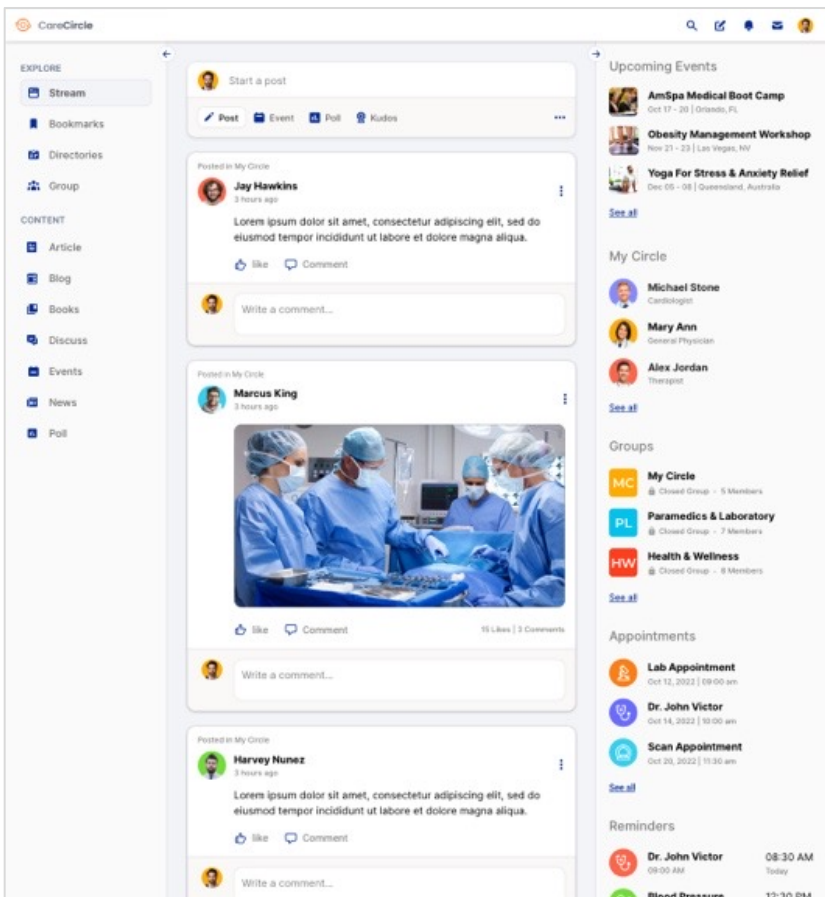

- **Customize the look & Feel** - The administrator can customize the platform based on the branding guideline of your institution using colors, images, etc.
- **General Configurations** - The platform allows many configurations, such as time & date, email verification, system email configurations, email content, regional settings etc.
- **Migration** - CareCircle platform supports migrating User information and other content.

- **Action Center** - CareCircle Actions help users to get work done through quick communications. Design the Action Templates based on your needs that act to collect, request, and post information. Actions play a crucial role in integrating any external application using APIs. Action Templates include new forms, feedback, applying for leave, Scheduling a meeting, and many more.

## Integration & Actions

- **Integration** – CareCircle seamlessly integrates with BigBlueButton, Google Analytics, Google meet, and many more.

## ACL Digital Healthcare

ACL Digital's Healthcare Practice works with healthcare organizations to engineer personalized Total Experiences - anytime, anywhere, and on demand. Our design-led engineering services have provided secure, compliant, interoperable Digital Healthcare and Medical Device Engineering solutions accelerating digital innovation, driving business transformation, and enabling industry-wide convergence. With a "Digital First and Total Experience" philosophy, we are the partner of choice for global MedTech, Medical Devices/OEMs, and ISVs, in their Digital Healthcare, Omnichannel Patient Engagement, Virtual First care (V1C), Connected Medical Devices, and Digital Front door strategy implementation journey.

- By uniting analytics, compliance, UX, cloud, and interoperability, we offer unique, scalable Digital solutions that aim to enhance the quality, convenience, and personalization of care delivery.
- Leverages the triple trifecta (Cloud, Analytics, and UX for medical devices) to integrate data across disparate systems – from imaging to vitals to claims – helping cross-reference, match historical patient information, proactively identify illness, and engage with patients.
