

Development and Implementation of Applications for Hi-Tech Industry

CASE STUDY

Project Overview
Implementation of Oracle Apps 11i

Industry Category
Hi -Tech

THE CLIENT

The Client is a global leader in developing and marketing database software and technology and enterprise software products. And, a maker of database development tools, ERP software, CRM software and SCM software. 2 years back, it became the second largest software maker.

SOLUTIONS DELIVERED

- Preparation of technical specifications from the functional specifications. Received from functional team like CV60, Md70 using AIM Methodology.
- Developing Reports, Conversions and Interface programs that are registered as Concurrent programs and which all run from SRS window.
- Designed & Developed PL/SQL Validation procedures, packages to execute PO Requisition conversion to load data from staging table to interface tables & transferring those data into Oracle Applications.

TECHNOLOGY USED

- AP, PO, CM
- iExpense (11.5.9, 11.5.10.2 and R12)

- Developed many SQL scripts using UTL_FILE for extracting data from PO and INV module underlying tables to generate flat files for data conversion.
- Developed new Reports through Reports 10g and XML Publisher according to the business requirements like VAT/CST REPORTS for different States.(India Localization)
